Independent Auditors' Report

To the Members of the Board of Directors Roanoke Valley Broadband Authority Roanoke, Virginia

Report on the Financial Statements

We have audited the accompanying financial statements of the business-type activities of the Roanoke Valley Broadband Authority, as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise the Authority's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the *Specifications for Audits of Authorities*, *Boards*, *and Commissions*, issued by the Auditor of Public Accounts of the Commonwealth of Virginia. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the business-type activities of the Roanoke Valley Broadband Authority, as of June 30, 2020, and the changes in financial position, and cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and schedules related to pension funding on pages 3-5 and 28-30, respectively, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated September 8, 2020, on our consideration of the Roanoke Valley Broadband Authority's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Roanoke Valley Broadband Authority's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Roanoke Valley Broadband Authority's internal control over financial reporting and compliance.

Management's Discussion and Analysis FY 2019/2020

Roanoke Valley Broadband Authority

This section of the Roanoke Valley Broadband Authority's (RVBA) annual financial report presents our discussion and analysis of the Authority's financial performance during the fiscal year that ended June 30, 2020. Please read it in conjunction with the Authority's financial statements and related notes which follow this section.

Overview of Activity

Operating revenues increased by 72% over the previous fiscal year. Operating expenditures (including depreciation) increased by approximately 8% percent over the previous fiscal year. Non-operating activities (comprised of government contributions, connection fees and interest income as offset by interest expense) decreased by approximately 3.5% from the previous year. The aforementioned items culminated in an increase of net position totaling \$1,130,563. This increase compares favorably to the prior year's increase of \$1,087,637.

The RVBA continued to expand its network footprint through the addition of approximately ten miles of fiber that supports both core backbone infrastructure and customer connections. The RVBA successfully completed expansions of the network through building connections to the Western Virginia Regional Jail and the Western Virginia Water Authority's Spring Hollow Reservoir facility in Roanoke County. A network expansion and connection was completed to support the new VA 811 and City of Roanoke 911 joint command center in the Blue Hills Industrial Park. In addition to expanding service to the government and business community, the RVBA continues to grow and expand offerings to major education and research institutions in the Innovation District of the City of Roanoke. The City of Salem has actively engaged the RVBA in economic development projects that support an open access model to enable Fiber to the Home (FTTH) projects. The County of Botetourt has partnered with the RVBA to develop mission critical telecommunications facilities in the Greenfield Center and develop the groundwork for FTTH projects. The RVBA considers it a great privilege to have the opportunity to positively impact the community it serves and the localities that support it.

On May 28, 2015, the RVBA issued its \$5,780,000 Broadband Infrastructure Revenue Bond, Series 2015 (the "First Bond") pursuant to a Local Bond Sale and Financing Agreement through the Virginia Resource Authority Virginia Pooled Financing Program. The First Bond is to be paid back by the City of Roanoke, Virginia, and the City of Salem, Virginia, by October 1, 2025, in accordance with a support agreement (the First Support Agreement") signed by the two participating jurisdictions. Funds were used to design, construct and operate the original 47-mile metropolitan, suburban and rural fiber optic telecommunications network with single ring architecture in the Roanoke Valley (the "Original Project"). The Authority continues to service this debt through contributions from the participants.

On August 10, 2016, the RVBA issued its \$3,450,000 Broadband Infrastructure Revenue Bond, Series 2015 (the "Second Bond") pursuant to a second Local Bond Sale and Financing Agreement through the Virginia Resource Authority Virginia Pooled Financing Program. The Second Bond is to be paid back by October 1, 2026 by the County of Roanoke, in accordance with a new support agreement (the Second Support Agreement") for the Second Bond. The First Support Agreement was amended by the City of Roanoke, Virginia, and the City of Salem, Virginia, with the First Amendment to the Support Agreement, which recognized Roanoke County's support obligation in the Second Support Agreement and equalized the support obligations of the three

localities. Funds were used to design, construct and operate an approximately 25-mile extension to the Original Project. Substantial completion of Phase II was completed on August 21, 2017. The Authority continues to service this debt through contributions from the participants.

The Western Virginia Water Authority continues to support the GIS mapping and payroll services requirements of the RVBA.

Virginia General Assembly Activities for Fiscal Year 2019/20

The RVBA continued to actively participate in the legislative process in Richmond, Virginia to support and maintain its right by law to provide municipal broadband services to the community.

Financial Analysis

Presented below is a Summary of the Authority's financial statements for the current and prior fiscal years. The Authority was in the development stage during these periods and therefore significant activity is related to the construction of infrastructure assets and basic operating expenditures.

Summary Statement of Net Position

	Fiscal Year Ending, June 30th					
		2020		2019		2018
Assets						
Current asset	\$	931,651	\$	738,278	\$	605,296
Non current assets		9,558,030		9,672,295		9,570,524

Total liabilities	\$	6,314,313	_\$_	7,355,956	_\$_	8,208,817
Deferred inflows of resources	\$	6,702	\$	9,923	_\$_	12,224
Net position						
Net investment in capital assets	\$	3,439,545	\$	2,464,765	\$	1,701,909
Unrestricted		742,858		587,075		262,294
Total net position	\$	4,182,403	\$	3,051,840	\$	1,964,203

The Summary of Net Position shows an increase of \$1,130,563.

Summary Statement of Revenues, Expenditures & Changes in Net Position

	Fiscal Year Ending, June 30th					
	***************************************	2020		2019		2018
Operating revenues	\$	564,619	\$	326,378	\$	410,424
Operating expenditures		(1,569,323)		(1,453,891)		(1,392,311)
Operating income (loss)	\$	(1,004,704)	\$	(1,127,513)	\$	(981,887)
Nonoperating revenues (expenses)	\$	2,135,267	\$	2,215,150	\$	1,906,940
Change in net position	\$	1,130,563	\$	1,087,637	\$	925,053
Net position, beginning of year		3,051,840		1,964,203		1,039,150
Net position, end of year	\$	4,182,403	\$	3,051,840	\$	1,964,203

Economic Factors and Future Outlook

The RVBA continues to expand its network and serve the Roanoke Valley to support its mission and mandate. The RVBA continues to examine and evaluate new services areas and delivery methods to support the Economic Development and well-being of the Roanoke Valley.

Contacting the Authority's Financial Management Staff

This financial report is designed to provide a general overview of the Authority's finances and show the Authority's accountability for the funds it receives. If you have any questions about this report or need additional information, contact the Authority's Chief Fiscal Officer at 601 S. Jefferson Street, Suite 110, Roanoke, Virginia 24011-2432, telephone 540-204-9200, or at odooley@highspeedroanoke.net.

Note 1-Summary of Significant Accounting Policies:

The financial statements of the Roanoke Valley Broadband Authority conform to generally accepted accounting principles (GAAP) applicable to governmental units promulgated by the Governmental Accounting Standards Board (GASB). The following is a summary of the more significant policies:

A. Financial Reporting Entity

The Roanoke Valley Broadband Authority was created as an authority pursuant to the Virginia Wireless Service Authorities Act, Chapter 54.1, Title 15.2 of the *Code of Virginia 1950 as amended*. The governing bodies of the County of Roanoke, the County of Botetourt, the City of Roanoke, and the City of Salem established the Roanoke Valley Broadband Authority (the "Authority") for the purpose of providing broadband services and related services to individuals and organizations within the boundaries of the aforementioned participating jurisdictions.

B. Basis of Accounting

The Roanoke Valley Broadband Authority, (the Authority) operates as an enterprise fund and its accounts are maintained on the accrual basis of accounting. Under this method, revenues are recognized when earned, and expenses are recorded as liabilities when incurred, without regard to receipt or payment of cash. The Authority accrues revenue for services rendered but not yet billed at the end of the fiscal year.

The Authority distinguishes operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services in connection with the Authority's principal ongoing operations. The principal operating revenues of the Authority will be charges to customers for services. Operating expenses include the cost of services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

C. Cash and Cash Equivalents

The Authority's cash and cash equivalents consist of cash on hand, demand deposits, certificates of deposit and short-term investments with original maturities of three months or less from the date of acquisition.

D. Basic Financial Statements

The Authority's financial statements have been prepared in accordance with accounting principles generally accepted in the United States as specified by the Governmental Accounting Standards Board (GASB).

Note 1-Summary of Significant Accounting Policies: (Continued)

D. <u>Basic Financial Statements</u> (Continued)

Since the Authority is only engaged in business-type activities, it is required to present only the financial statements required for enterprise funds. For the Authority, the basic financial statements and required supplementary information consist of:

- Enterprise fund financial statements
 - o Statement of Net Position
 - o Statement of Revenues, Expenses, and Changes in Net Position
 - Statement of Cash Flows
 - Notes to the Financial Statements
- Required supplementary information

E. Deferred Outflows/Inflows of Resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense) until then. The Roanoke Valley Broadband Authority has two items that qualify for reporting in this category.

- Item one is comprised of contributions to the pension plan made during the current year and subsequent to the net pension liability measurement date, which will be recognized as an adjustment of the net pension liability next fiscal year. For more detailed information on these items, refer to the pension note herein (note 6).
- Item two is comprised of certain items related to the measurement of the net pension liability/asset. This includes the net difference between projected and actual earnings on pension plan investments. For more detailed information on this item, refer to the pension note herein (note 6).

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The Roanoke Valley Broadband Authority has one type of item that qualifies for reporting in this category.

• Certain items related to the measurement of the net pension asset are reported as deferred inflows of resources. For more detailed information on these items, refer to the pension note herein (note 6).

Note 1-Summary of Significant Accounting Policies: (Continued)

F. Restricted Assets

Certain resources set aside from bond proceeds are classified as restricted assets on the statement of net position because they are maintained in separate bank and/or investment accounts and their use is limited by applicable bond covenants. At year end, restricted assets totaling \$1,067,361 were comprised of debt service reserves of \$1,057,332 and escrow funds totaling \$10,029 held pursuant to an escrow agreement with American Electric Power, Inc.

G. Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., water and sewer systems), are reported in the financial statements. Capital assets are defined by the Authority as assets with an initial, individual cost of more than \$5,000 (amount not rounded) and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed.

Donated capital assets are recorded at estimated acquisition value at the date of donation. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend the asset's life are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets is included as part of the capitalized value of the assets constructed. Interest expense for the period totaled \$172,955. Property, plant, and equipment and infrastructure are depreciated using the straight-line method over the following estimated useful lives:

Asset	Years
Infrastructure	10-30
Easements	30
Leasehold improvements	term of lease
Equipment	5

H. Prepaid Items

Certain payments to vendors represent costs applicable to future accounting periods and are recorded as prepaid items in the financial statements. The cost of prepaid items is recorded as an expense when consumed rather than when purchased.

I. Other Significant Accounting Policies

• The Authority bills for services in advance; therefore, no allowance for doubtful accounts has been reported.

Note 1-Summary of Significant Accounting Policies: (Continued)

J. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

K. Investments

Money market investments, participating interest-earning investment contracts (repurchase agreements) that have a remaining maturity at time of purchase of one year or less, nonparticipating interest-earning investment contracts (nonnegotiable certificates of deposit (CDs) and external investment pools are measured at amortized cost. All other investments are reported at fair value.

L. Compensated Absences

The liability for compensated absences reported in the financial statements consists of unpaid accumulated leave balances. The liability is based on the leave accumulated at June 30. Limited leave may be accumulated until retirement or termination. Accumulated leave is paid at the employee's current wage upon retirement or termination.

M. Net Position

The difference between assets and deferred outflows of resources less liabilities and deferred inflows of resources is called net position. Net position is comprised of three components: net investment in capital assets, restricted, and unrestricted.

- Net investment in capital assets consists of capital assets, net of accumulated depreciation and reduced by outstanding balances of bonds, notes, and other debt that are attributable to the acquisition, construction, or improvement of those assets. Deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of those assets or related debt are included in this component of net position.
- Restricted net position consists of restricted assets reduced by liabilities and deferred inflows of resources related to those assets. Assets are reported as restricted when constraints are placed on asset use either by external parties or by law through constitutional provision or enabling legislation.
- Unrestricted net position is the net amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that does not meet the definition of the two preceding categories.

Sometimes the Authority will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted - net position and unrestricted - net position in the financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the Authority's policy to consider restricted - net position to have been depleted before unrestricted - net position is applied.

Note 2-Deposits and Investments:

<u>Deposits</u>: Deposits with banks are covered by the Federal Deposit Insurance Corporation (FDIC) and collateralized in accordance with the Virginia Security for Public Deposits Act (the "Act") Section 2.2-4400 et. Seq. of the <u>Code of Virginia</u>. Under the Act, banks and savings institutions holding public deposits in excess of the amount insured by the FDIC must pledge collateral to the Commonwealth of Virginia Treasury Board. Financial Institutions may choose between two collateralization methodologies and depending upon choice, will pledge collateral that ranges in the amounts from 50% to 130% of excess deposits. Accordingly, all deposits are considered fully collateralized.

<u>Investments</u>: Statutes authorize local governments and other public bodies to invest in obligations of the United States or agencies thereof, obligations of the Commonwealth of Virginia or political subdivisions thereof, obligations of the International Bank for Reconstruction and Development (World Bank), the Asian Development Bank, the African Development Bank, "prime quality" commercial paper that has received at least two of the following ratings: P-1 by Moody's Investors Service, Inc.; A-1 by Standard and Poor's; or F1 by Fitch Ratings Inc. (Section 2.2-4502), banker's acceptances, repurchase agreements, and the State Treasurer's Local Government Investment Pool (LGIP).

Credit Risk of Debt Securities

The Organization's rated debt investments as of June 30, 2020 were rated by Standard and Poor's and/or an equivalent national rating organization and the ratings are presented below using the Standard and Poor's rating scale.

Authority's Rated Debt Investme	nts' Values	
Rated Debt Investments	Fair Qu	ality Ratings
		AAAm
First American Government Obligations Fund	\$	1,057,332

Interest Rate Risk

The Organization has not adopted an investment policy for interest rate risk. Investments subject to interest rate risk are presented below along with their corresponding maturities.

	Investment Maturities (in years)		
Investment Type	Fair Value	Less 1 yr	6-10 yrs
First American Government Obligations Fund	\$ 1,057,332	\$ 1,057,332	\$ -

Concentration of Credit Risk

The Organization has not adopted an investment policy for concentration of credit risk.

Note 3-Fair Value Measurement:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Authority categorizes its fair value measurements within the fair value hierarchy establish by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. The Authority maximizes the use of observable inputs and minimized the use of unobservable inputs. Observable inputs are inputs that market participants would use in pricing the asset or liability based on market data obtained from independent sources. Unobservable inputs reflect assumptions that market participants would use in pricing the asset or liability based on the best information available in the circumstances. The fair value hierarchy categorizes the inputs to valuation techniques used to measure fair value into three levels as follows:

- Level 1 Quoted prices (unadjusted) for identical assets or liabilities in active markets that a government can access at a measurement date
- Level 2 Directly or indirectly observable inputs for the asset or liability other than quoted prices
- Level 3 Unobservable inputs that are supported by little or no market activity for the asset or liability

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk.

The Authority has the following recurring fair value measurements as of June 30, 2020:

	Fair \	Value Measurement Usi	ng
	Quoted Prices in	Significant	Significant
	Active Markets	Other Observable	Unobservable
	for Identical Assets	Inputs	Inputs
	Level 1	Level 2	Level 3
First American Government Obligations Fund	\$ 1,057,332	\$ -	\$ -

Note 4-Capital Assets:

A summary of changes in capital assets for the year ended June 30, 2020 follows:

	_	Beginning Balance	_	Increases	_	Decreases		Ending Balance
Capital assets, not being depreciated: Construction in progress	\$_	264,832	\$_	29,349	\$_	(264,832)	\$	29,349
Total capital assets not being depreciated, net	\$_	264,832	\$_	29,349	\$_	(264,832)	\$_	29,349
Capital assets, being depreciated: Purchased easements Leasehold improvements Equipment Infrastructure Total capital assets being depreciated	\$ \$_	76,693 6,416 14,344 9,196,421 9,293,874	\$ \$_	1,690 - 40,445 481,849 523,984	\$	- - -	\$ \$_	78,383 6,416 54,789 9,678,270 9,817,858

Total capital assets being depreciated, net	\$_	8,320,773	\$	137,062	. \$	_	. \$_	8,457,835
Capital assets, net	\$_	8,585,605	\$	166,411	\$ 4	(264,832)	\$_	8,487,184

At year end, accounts and retainage payable related to construction projects totaled \$0.

Note 5-Long-term Obligations:

The following is a summary of long-term obligation transactions of the Authority for the year ended June 30, 2020:

	<u>J</u> ı	Balance ıly 1, 2019	Issuances			etirements		Balance June 30, 2020	
Revenue bonds Compensated absences Total	\$ <u>\$</u>	6,990,000 31,531 7,021,531	\$	31,799 31,799	\$	(875,000) (23,648) (898,648)	\$ \$	6,115,000 39,682 6,154,682	

Annual requirements to amortize long-term obligations and the related interest are as follows:

Year Ending	Revenue bonds							
June 30,	Principal		Interest					
2021	\$ 890,000	\$	159,216					
2022	915,000		138,268					
2023	940,000		114,171					
2024	970,000		87,188					
2025	995,000		57,633					
2026-2027	1,405,000		31,133					
Totals	\$ 6,115,000	`\$ <u> </u>	587,609					

Note 5-Long-term Obligations: (Continued)				
Details of long-term obligations:				
		Total Amount Due		Amount Due Within One Year
Revenue Bonds	-			
\$5,780,000 in taxable revenue bonds issued on May 28, 2015. The bonds bear interest at rates ranging from 0.899% to 3.516% depending on maturity date. The bonds mature annually in amounts ranging from \$525,000 to \$655,000 on October 1, 2016 through October 1, 2025. Interest payments are due semi-annually on April 1st and October 1st.	\$	3,635,000	\$	560,000
\$3,450,000 in taxable revenue bonds issued on July 27, 2016. The bonds bear interest at rates ranging from 1.141% to 2.622% depending on maturity date. The bonds mature annually in amounts ranging from \$320,000 to \$380,000 on October 1, 2017 through October 1, 2026. Interest payments are due semi-annually on April 1st and October 1st.		2,480,000		330,000
Subtotal	\$	6,115,000	\$	890,000
Other Long-Term Obligations Compensated absences	\$	39,682	. \$	29,761
Total long-term obligations	\$	6,154,682	\$ =	919,761

Note: Support agreements for revenue bonds have been issued by Roanoke County and the Cities of Roanoke and Salem.

Note 6-Pension Plan:

Plan Description

All full-time, salaried permanent employees of the Authority are automatically covered by VRS Retirement Plan upon employment, through the Western Virginia Water Authority. This is an agent multiple-employer plan administered by the Virginia Retirement System (the System) along with plans for other employer groups in the Commonwealth of Virginia. However, several entities participate in the VRS plan through Western Virginia Water Authority and the participating entities report their proportionate information on the basis of a cost-sharing plan. Members earn one month of service credit for each month they are employed and for which they and their employer pay contributions to VRS. Members are eligible to purchase prior service, based on specific criteria as defined in the <u>Code of Virginia</u>, as amended. Eligible prior service that may be purchased includes prior public service, active military service, certain periods of leave, and previously refunded service.

Benefit Structures

The System administers three different benefit structures for covered employees - Plan 1, Plan 2 and Hybrid. Each of these benefit structures has different eligibility criteria, as detailed below.

- a. Employees hired before July 1, 2010, vested as of January 1, 2013, and have not taken a refund, are covered under Plan 1, a defined benefit plan. Non-hazardous duty employees are eligible for an unreduced retirement benefit beginning at age 65 with at least 5 years of service credit or age 50 with at least 30 years of service credit. Non-hazardous duty employees may retire with a reduced benefit as early as age 55 with at least 5 years of service credit or age 50 with at least 10 years of service credit.
- b. Employees hired on or after July 1, 2010, or their membership date is before July 1, 2010, and they were not vested as of January 1, 2013 are covered under Plan 2, a defined benefit plan. Non-hazardous duty employees are eligible for an unreduced benefit beginning at their normal social security retirement age with at least 5 years of service credit or when the sum of their age plus service credit equals 90. Non-hazardous duty employees may retire with a reduced benefit as early as age 60 with at least 5 years of service credit.
- c. Non-hazardous duty employees hired on or after January 1, 2014 are covered by the Hybrid Plan combining the features of a defined benefit plan and a defined contribution plan. Plan 1 and Plan 2 members also had the option of opting into this plan during the election window held January 1 April 30, 2014 with an effective date of July 1, 2014. Employees covered by this plan are eligible for an unreduced benefit beginning at their normal social security retirement age with at least 5 years of service credit, or when the sum of their age plus service credit equals 90. Employees may retire with a reduced benefit as early as age 60 with at least 5 years of service credit. For the defined contribution component, members are eligible to receive distributions upon leaving employment, subject to restrictions.

Note 6-Pension Plan: (Continued)

Average Final Compensation and Service Retirement Multiplier

The VRS defined benefit is a lifetime monthly benefit based on a retirement multiplier as a percentage of the employee's average final compensation multiplied by the employee's total service credit. Under Plan 1, average final compensation is the average of the employee's 36 consecutive months of highest compensation and the multiplier is 1.70% for non-hazardous duty employees and 1.85% for sheriffs and regional jail superintendents. Under Plan 2, average final compensation is the average of the employee's 60 consecutive months of highest compensation and the retirement multiplier is 1.65% for non-hazardous duty employees and 1.85% for sheriffs and regional jail superintendents. Under the Hybrid Plan, average final compensation is the average of the employee's 60 consecutive months of highest compensation and the multiplier is 1.00%. For members who opted into the Hybrid Retirement Plan from Plan 1 or Plan 2, the applicable multipliers for those plans will be used to calculate the retirement benefit for service credited in those plans.

Cost-of-Living Adjustment (COLA) in Retirement and Death and Disability Benefits

Retirees with an unreduced benefit or with a reduced benefit with at least 20 years of service credit are eligible for an annual COLA beginning July 1 after one full calendar year from the retirement date. Retirees with a reduced benefit and who have less than 20 years of service credit are eligible for an annual COLA beginning on July 1 after one calendar year following the unreduced retirement eligibility date. Under Plan 1, the COLA cannot exceed 5.00%. Under Plan 2 and the Hybrid Plan, the COLA cannot exceed 3.00%. The VRS also provides death and disability benefits. Title 51.1 of the Code of Virginia, as amended, assigns the authority to establish and amend benefit provisions to the General Assembly of Virginia.

Contributions

The contribution requirement for active employees is governed by §51.1-145 of the <u>Code of Virginia</u>, as amended, but may be impacted as a result of funding options provided to political subdivisions by the Virginia General Assembly. Employees are required to contribute 5.00% of their compensation toward their retirement.

The Authority's contractually required employer contribution rate for the year ended June 30, 2020 was 4.60% of covered employee compensation. This rate was based on an actuarially determined rate from an actuarial valuation as of June 30, 2017.

This rate, when combined with employee contributions, was expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. Contributions to the pension plan from the Authority were \$3,195 and \$5,555 for the years ended June 30, 2020 and June 30, 2019, respectively.

Note 6-Pension Plan: (Continued)

Net Pension Liability (Asset)

At June 30, 2020, the Authority reported an asset of \$3,485 for its proportionate share of the net pension asset. The net pension liability (asset) is calculated separately for each employer and represents that particular employer's total pension liability (asset) determined in accordance with GASB Statement No. 68, less that employer's fiduciary net position. The Authority's net pension asset was measured as of June 30, 2019. The total pension liability (asset) used to calculate the net pension liability (asset) was determined by an actuarial valuation performed as of June 30, 2018 rolled forward to the measurement date of June 30, 2019. The Authority's proportionate share of the same was calculated using creditable compensation as of June 30, 2019 and 2018 as a basis for allocation. At June 30, 2019 and 2018, the Authority's proportion was .7712% and 1.3286%, respectively.

Actuarial Assumptions - General Employees

The total pension liability for General Employees in the Authority's Retirement Plan was based on an actuarial valuation as of June 30, 2018, using the Entry Age Normal actuarial cost method and the following assumptions, applied to all periods included in the measurement and rolled forward to the measurement date of June 30, 2019.

> 2.50% Inflation

Salary increases, including inflation 3.50% - 5.35%

6.75%, net of pension plan investment Investment rate of return

expense, including inflation*

* Administrative expenses as a percent of the market value of assets for the last experience study were found to be approximately 0.06% of the market assets for all of the VRS plans. This would provide an assumed investment return rate for GASB purposes of slightly more than the assumed 6.75%. However, since the difference was minimal, and a more conservative 6.75% investment return assumption provided a projected plan net position that exceeded the projected benefit payments, the long-term expected rate of return on investments was assumed to be 6.75% to simplify preparation of pension liabilities.

Mortality rates:

All Others (Non-10 Largest) - Non-Hazardous Duty: 15% of deaths are assumed to be service related Pre-Retirement:

RP-2014 Employee Rates to age 80, Healthy Annuitant Rates at ages 81 and older projected with scale BB to 2020; males 95% of rates; females 105% of rates.

Post-Retirement:

RP-2014 Employee Rates to age 49, Healthy Annuitant Rates at ages 50 and older projected with scale BB to 2020; males set forward 3 years; females 1.0% increase compounded from ages 70 to 90.

Post-Disablement:

RP-2014 Disability Mortality Rates projected with scale BB to 2020; males set forward 2 years, 110% of rates; females 125% of rates.

Note 6-Pension Plan: (Continued)

Actuarial Assumptions - General Employees (Continued)

The actuarial assumptions used in the June 30, 2018 valuation were based on the results of an actuarial experience study for the period from July 1, 2012 through June 30, 2016, except the change in the discount rate, which was based on VRS board action effective as of July 1, 2019. Changes to the actuarial assumptions as a result of the experience study and VRS Board action are as follows:

All Others (Non-10 Largest) - Non-Hazardous Duty:

Mortality Rates (pre-retirement, post-

retirement healthy, and disabled)

Retirement Rates

Withdrawal Rates

WILLIAMAL MALES

Disability Rates
Salary Scale

Line of Duty Disability

Discount Rate

Updated to a more current mortality table - RP-2014

projected to 2020

Lowered rates at older ages and changed final retirement

from 70 to 75

Adjusted rates to better fit experience at each year age

and service through 9 years of service

Lowered rates

No change

Increased rate from 14.00% to 15.00%

Decreased rate from 7.00% to 6.75%

Long-Term Expected Rate of Return

The long-term expected rate of return on pension System investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of pension System investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target asset allocation and best estimate of arithmetic real rates of return for each major asset class are summarized in the following table:

Note 6-Pension Plan: (Continued)

Long-Term Expected Rate of Return

The long-term expected rate of return on pension System investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of pension System investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target asset allocation and best estimate of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class (Strategy)	Target Allocation	Arithmetic Long-term Expected Rate of Return	Weighted Average Long-term Expected Rate of Return*
Public Equity	34.00%	5.61%	1.91%
Fixed Income	15.00%	0.88%	0.13%
Credit Strategies	14.00%	5.13%	0.72%
Real Assets	14.00%	5.27%	0.74%
Private Equity	14.00%	8.77%	1.23%
MAPS - Multi-Asset Public Strategies	6.00%	3.52%	0.21%
PIP - Private Investment Partnership	3.00%	6.29%	0.19%
Total	100.00%		5.13%
		Inflation	2.50%
	Expected arithmet	ic nominal return*	7.63%

^{*} The above allocation provides a one-year return of 7.63%. However, one-year returns do not take into account the volatility present in each of the asset classes. In setting the long-term expected return for the system, stochastic projections are employed to model future returns under various economic conditions. The results provide a range of returns over various time periods that ultimately provide a median return of 7.11%, including expected inflation of 2.50%. The VRS Board elected a long-term rate of 6.75% which is roughly at the 40th percentile of expected long-term results of the VRS fund asset allocation.

Note 6-Pension Plan: (Continued)

Discount Rate

The discount rate used to measure the total pension liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that System member contributions will be made per the VRS Statutes and the employer contributions will be made in accordance with the VRS funding policy at rates equal to the difference between actuarially determined contribution rates adopted by the VRS Board of Trustees and the member rate. Consistent with the phased-in funding provided by the General Assembly for state and teacher employer contributions; political subdivisions were also provided with an opportunity to use an alternate employer contribution rate. For the year ended June 30, 2019, the alternate rate was the employer contribution rate used in FY 2012 or 100% of the actuarially determined employer contribution from the June 30, 2017, actuarial valuations, whichever was greater. From July 1, 2019 on, participating employers are assumed to continue to contribute 100% of the actuarially determined contribution rates. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Authority's Proportionate Share of the Net Pension Liability (Asset) to Changes in the Discount Rate

The following presents the Authority's proportionate share of the net pension liability (asset) using the discount rate of 6.75%, as well as what the Authority's proportionate share of the net pension liability (asset) would be if it were calculated using a discount rate that is one percentage point lower (5.75%) or one percentage point higher (7.75%) than the current rate:

				Rate		
	(5.75%)		(6.75%)	(7.75%)	
Authority's proportionate share of the Authority Retirement Plan Net Pension Liability (Asset)	\$	15,696	S	(3,485)	\$	(18,569)

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the year ended June 30, 2020, the Authority recognized pension expense of \$3,324. Since there was a change in proportionate share between measurement dates, a portion of the pension expense was related to deferred amounts from changes in proportion and from differences between employer contributions and the proportionate share of employer contributions.

Note 6-Pension Plan: (Continued)

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions (Continued)

At June 30, 2020, the Authority reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	 i Outflows sources	Deferred Inflows of Resources		
Differences between expected and actual experience	\$ 1,672 \$	1,896		
Change in assumptions	3,414	2,469		
Net difference between projected and actual earnings on pension plan investments	_	2,337		
Changes in proportion and differences between employer contributions and proportionate share of contributions	5,456	-		
Employer contributions subsequent to the measurement date	 3,195			
Total	\$ 13,737	6,702		

\$3,195 reported as deferred outflows of resources related to pensions resulting from the Authority's contributions subsequent to the measurement date will be recognized as a reduction of the Net Pension Liability in the fiscal year ending June 30, 2021. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense in future reporting periods as follows:

Year ended June 30	
2021	\$ 516
2022	(450)
2023	3,035
2024	739
2025	-
Thereafter	-

Note 6-Pension Plan: (Continued)

Pension Plan Data

Information about the VRS Political Subdivision Retirement Plan is also available in the separately issued VRS 2019 Comprehensive Annual Financial Report (CAFR). A copy of the 2019 VRS CAFR may be downloaded from the VRS website at http://www.varetire.org/Pdf/Publications/2019-annual-report.pdf, or by writing to the System's Chief Financial Officer at P.O. Box 2500, Richmond, VA 23218-2500.

Note 7-Risk Management:

The Authority is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; and natural disasters. The Authority participates with other government entities in a public entity risk pool for their coverage of liability insurance through the Virginia Municipal League (VML). Each member of this risk pool jointly and severally agrees to assume, pay and discharge any liability. The Authority makes contributions to a designated cash reserve fund out of which expenses of the pool, claims and awards are to be paid. In the event of a loss, deficit, or depletion of all available excess insurance, the pool may assess all members in the proportion to which the premium of each bears to the total premiums of all members in the year in which such deficit occurs. Settled claims resulting from the aforementioned risks have not exceeded coverage in any of the past three years.

Note 8-Concentration of Funding:

The Authority received approximately 70% of its revenue in the current year from participant contributions and expects additional contributions will be necessary until a customer base sufficient to cover projected operating and capital costs is established.

Note 9-Subsequent Event:

On January 30, 2020, the World Health Organization ("WHO") announced a global health emergency because of a new strain of coronavirus (the "COVID-19 outbreak") and the risks to the international community as the virus spreads globally beyond its point of origin. In March 2020, the WHO classified the COVID-19 outbreak as a pandemic based on the rapid increase in exposure globally.

The full impact of the COVID-19 outbreak continues to evolve as of the release date of this report. As such, the full magnitude that the pandemic will have on the Authority's financial condition, liquidity, and future results of operations is uncertain. Management is monitoring the global situation and impact that it may have on its financial condition, liquidity, operations, suppliers, industry, and workforce. Given the daily evolution of the COVID-19 outbreak and global responses to curb its spread, the Authority is not able to estimate the effects of the COVID-19 outbreak on its results of operations, financial condition, or liquidity for fiscal year 2021.

Note 10-Upcoming Pronouncements:

Statement No. 84, Fiduciary Activities, establishes criteria for identifying fiduciary activities of all state and local governments for accounting and financial reporting purposes and how those activities should be reported. The requirements of this Statement are effective for reporting periods beginning after December 15, 2019.

Note 10-Upcoming Pronouncements: (Continued)

Statement No. 87, Leases, requires recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. The requirements of this Statement are effective for reporting periods beginning after June 15, 2021.

Statement No. 89, Accounting for Interest Cost Incurred Before the End of a Construction Period, provides guidance for reporting capital assets and the cost of borrowing for a reporting period and simplifies accounting for interest cost incurred before the end of a construction period. The requirements of this Statement are effective for reporting periods beginning after December 15, 2020. (Note to Auditor: Early application is encouraged so you may consider discussing this with the client for implementation now if there are construction projects underway. If early implemented, modify the opinion and governance letter to reflect early implementation.)

Statement No. 90, Majority Equity Interests - An Amendment of GASB Statements No, 14 and No. 61, provides guidance for reporting a government's majority equity interest in a legally separate organization and for reporting financial statement information for certain component units. The requirements of this Statement are effective for reporting periods beginning after December 15, 2019.

Statement No. 91, Conduit Debt Obligations, provides a single method of reporting conduit debt obligations by issuers and eliminates diversity in practice associated with (1) commitments extended by issuers, (2) arrangements associated with conduit debt obligations, and (3) related note disclosures. The requirements of this Statement are effective for reporting periods beginning after December 15, 2021.

Statement No. 92, Omnibus 2020, addresses practice issues that have been identified during implementation and application of certain GASB Statements. This Statement addresses a variety of topics such as leases, assets related to pension and postemployment benefits, and reference to nonrecurring fair value measurements of assets or liabilities in authoritative literature. The effective dates differ by topic, ranging from January 2020 to periods beginning after June 15, 2021.

Statement No. 93, Replacement of Interbank Offered Rates, establishes accounting and financial reporting requirements related to the replacement of Interbank Offered Rates (IBORs) in hedging derivative instruments and leases. It also identifies appropriate benchmark interest rates for hedging derivative instruments. The requirements of this Statement, except for removal of London Interbank Offered Rate (LIBOR) as an appropriate benchmark interest rate and the requirements related to lease modifications, are effective for reporting periods beginning after June 15, 2020. The removal of LIBOR as an appropriate benchmark interest rate is effective for reporting periods ending after December 31, 2021. All requirements related to lease modifications in this Statement are effective for reporting periods beginning after June 15, 2021.

Statement No. 94, Public-Private and Public-Public Partnerships and Availability of Payment Arrangements, addresses issues related to public-private and public-public partnership arrangements. This Statement also provides guidance for accounting and financial reporting for availability payment arrangements. The requirements of this Statement are effective for reporting periods beginning after June 15, 2022.

Note 10-Upcoming Pronouncements: (Continued)

Statement No. 96, Subscription-Based Information Technology Arrangements (SBITAs), (1) defines a SBITA; (2) establishes that a SBITA results in a right-to-use subscription asset—an intangible asset—and a corresponding subscription liability; (3) provides the capitalization criteria for outlays other than subscription payments, including implementation costs of a SBITA; and (4) requires note disclosures regarding a SBITA. The requirements of this Statement are effective for reporting periods beginning after June 15, 2022.

Statement No. 97, Certain Component Unit Criteria, and Accounting and Financial Reporting for Internal Revenue Code (IRC) Section 457 Deferred Compensation Plans - an Amendment of GASB Statements No. 14 and No. 84, and a Supersession of GASB Statement. No 32, (1) increases consistency and comparability related to reporting of fiduciary component units in certain circumstances; (2) mitigates costs associated with the reporting of certain plans as fiduciary component units in fiduciary fund financial statements; and (3) enhances the relevance, consistency, and comparability of the accounting and financial reporting for Section 457 plans that meet the definition of a pension plan and for benefits provided through those plans. The effective dates differ based on the requirements of the Statement, ranging from June 2020 to reporting periods beginning after June 15, 2021.

Management is currently evaluating the impact these standards will have on the financial statements when adopted.

Schedule of Authority's Proportionate Share of the Net Pension Liability (Asset) - Pension Plan For the Measurement Dates of June 30, 2017 through June 30, 2019

Date (1)	Proportion of the Net Pension Liability (Asset) (NPLA) (2)	n		Covered Payroll (4)	Proportionate Share of the NPL as a Percentage of Covered Payroll (3)/(4) (5)	Pension Plan's Fiduciary Net Position as a Percentage of Total Pension Liability (Asset) (6)	
2019	0.7712%	\$ (3,485)	\$	295,231	-1.18%	102.69%	
2018	1.3286%	(15,757)		261,170	-6.03%	108.13%	
2017	1,4056%	(13,615)		209,362	-6.50%	107.42%	
2016	1.2736%	4,837		101,538	4.76%	96.87%	

Schedule is intended to show information for 10 years. The Authority did not participate in VRS until the 2016 fiscal year. As such, data is shown for all applicable periods.

Schedule of Employer Retirement Contributions - Pension Plan Years Ended June 30, 2016 through June 30, 2020

Date		ontractually Required ontribution (1)	Contributions in Relation to Contractually Required Contribution (2)	Contribution Deficiency (Excess) (3)	Employer's Covered Payroll (4)	Contributions as a % of Covered Payroll (5)
2020	- s	3,195 \$	3,195 \$	- \$	256,000	1.25%
2019	•	5,555	5,555	-	295,231	1.88%
2018		7,960	7,960	-	261,170	3.05%
2017		6,873	6,873	-	209,362	3.28%
2016		4,020	4,020	-	101,538	3.96%

Schedule is intended to show information for 10 years; however the Authority did not participate in the retirement plan until the fiscal year ending June 30, 2016.

Notes to Required Supplementary Information - Pension Plan Year Ended June 30, 2020

Changes of benefit terms - There have been no actuarially material changes to the System benefit provisions since the prior actuarial valuation.

Changes of assumptions - The actuarial assumptions used in the June 30, 2018 valuation were based on the results of an actuarial experience study for the period from July 1, 2012 through June 30, 2016, except the change in the discount rate, which was based on VRS Board action effective as of July 1, 2019. Changes to the actuarial assumptions as a result of the experience study and VRS Board action are as follows:

All Others (Non 10 Largest) - Non-Hazardous Duty:

Mortality Rates (pre-retirement, post-retirement healthy, Updated to a more current mortality table - RP-2014 projected to 2020

Retirement Rates

Independent Auditors' Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements

Performed in Accordance with Government Auditing Standards

To the Members of the Board of Directors Roanoke Valley Broadband Authority Roanoke, Virginia

We have audited, in accordance with the auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States; and the *Specifications for Audits of Authorities, Boards and Commissions*, issued by the Auditor of Public Accounts of the Commonwealth of Virginia, the financial statements of the business-type activities of the Roanoke Valley Broadband Authority, as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise the Roanoke Valley Broadband Authority's basic financial statements, and have issued our report thereon dated September 8, 2020.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Roanoke Valley Broadband Authority's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Roanoke Valley Broadband Authority's internal control. Accordingly, we do not express an opinion on the effectiveness of the Roanoke Valley Broadband Authority's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or, significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Roanoke Valley Broadband Authority's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
